

# Music Curation Schema

## Elements

### `<fileDesc>`

Element used to describe the specific notated data file. It include descriptions of the work's authorship.

### `<title>`

Element used to describe the title of the piece.

The attribute `type` with the attribute value `"subordinate"` may be used to describe subtitles or annotations to the tile.

### `<composer>`

Element used to describe the composer(s) of the piece. It is not displayed by Verovio Editor.

Authority should be linked in the attribute `authURI` and described in the attribute `authority`.

Alternatively, the attribute `role` with the attribute value `"composer"` can be added to the element `<persName>` to describe the composer(s) of a piece. This will be displayed by Verovio Editor.

Authority should be linked in the attribute `authURI` and described in the attribute `authority`.

### `<persName>`

Element used to describe the personnel involved in the creation, encoding, transcription and distribution of the piece.

Whenever a PID is available, authority should be linked in the attribute `authURI` and described in the attribute `authority`.

The attribute `role` with the attribute value `"composer"` can be added to the element `<persName>` to describe the composer(s) of a piece (see `<title>`). This will be displayed by Verovio Editor.

The attribute `role` with the attribute value `"songwriter"` can be added to the element `<persName>` to describe the songwriter(s) of a piece. This will not be displayed by Verovio Editor.

The attribute `role` with the attribute value `"encoder"` can be added to the element `<persName>` to describe the encoder(s) of the descriptive metadata of a transcription file. This will not be displayed by Verovio Editor.

The attribute `role` with the attribute value `"transcriber"` can be added to the element `<persName>` to describe the transcriber(s) of a specific notation transcription. This will not be displayed by Verovio Editor.

#### `<releaseDate>`

Date when the work was released. It should be expressed as `YYYY-MM-DD`.

#### `<ISRC>`

Describes the ISRC (*International Standard Recording Code*) of the specific music work.

#### `<sourceDesc>`

##### `<identifier>`

Element used to identify the unique source URL for the specific notated data.

The attribute `type` with the attribute value `"URI"` may be used to link the source notated data.
